[Disclaimer: Rated NC-17

If you are looking for a romantic, lovey-dovey astrology report, you won't find it within these pages. Please keep in mind all of the kinky, spirited and feisty remarks you will read are only intended in the spirit of fun, and are only suggestions for ways to play and perhaps challenge your boundaries. Feel free to happily ignore all wet and salacious remarks that do not apply.]

Herein lies the Gate to your Sexual Self

Its scent is musky and its feel is moist. Its song is sweet and trembling, feverish and blinding, dark and tormenting, frigid and cold. If you read things here that furrow your brow, causing a crease that looks remarkably like a little man in a boat, this is a sign from the gods that you are about to learn something momentous! Brace your buttocks in your chair! Should you not be in the mood to knock on the limbic door of your inner brain, quickly shut this report! No one need ever know...

The Building Blocks Of Your Nature

Fresh and simple!

You don't have very many planets in the air signs in your chart (Gemini, Libra, and/or Aquarius). With not much air, you receive lots of your knowledge intuitively, like Einstein, with the manual, cranking mental process actually blocking that great right brain flow. Rely on touch and feel and your intuition, to guide you and give you ideas on how to proceed sexually and otherwise. Deliberate, eyeball-crossing thinking will only slow down the works! Tune into your partner's feelings and sensations and ideas that suddenly pop into your head and, using that as a gauge, increase or decrease the intensity of your sexual applications. You may not appreciate a partner who has steady conversation going on during sex. A brown paper bag over the head is a helpful tactic.

Eager to drench!

You have lots of planets in the water signs in your chart (Cancer, Scorpio, and/or Pisces). With lots of water, emotions color everything you do. You are constantly sniffing out the vibrations in a room, or around a person. You can feel your partner's reactions and feelings quite well. This is very seductive. It can be a great boon, subtly shifting and moving according to the partner's sexual needs. They will think you are a magician! It can also be a problem, as lots of water can be in-your-face and smothering, without boundaries. It's like getting a cellular-level body wash with someone else's bathwater. A little disconcerting! Have your partner tell you when to back off, and then do so graciously without pouting or making sullen remarks.

Your General Scent

Your Scent is Strong and Distinctive.

You have a lot of planets in fixed signs (Taurus, Leo, Scorpio, and/or Aquarius) which render you thick, like the heavy rind on piece of fruit. It gives a steady, reassuring feel, along with a strong will that can be felt many yards away. You naturally dominate scenes in your life, either covertly or overtly, pressing your strength into the laps of your lovers. You like to be in control, so a partner who needs a little steadiness and strength is a godsend. On the other hand, a changeable, lively partner, while at first appearing stimulating, may eventually drive you to distraction. You need to get your way more than the average Joe, so tell your partner this when first starting out, even if you have to shell out a few bucks to make it so!

THE SIGN ON THE ASCENDANT: Your Animal Skin

The Ascendant in your chart, (otherwise known affectionately to this astrologer as “the Rising Sign”) is your own native animal skin you wear about your shoulders and through which you physically face the world. It is the sign that was spreading out its earthly influence all over the horizon, opening its legs and scenting you with its own musky peculiarities when you were born. This paints your personality with colorful symbols, richness and a certain vibratory chemistry.

“Excuse me while I slip into someone more comfortable.” Unknown

Your Animal Skin is in Libra.

The scientific sexologist, you have researched sex and find the idea of it fascinating and romantic. You would like to try your knowledge out on intelligent and non-repressed partners. Partnership orientated, you want to please your partners in an active, romantic, idealistic way. And they all respond to this by the mere fact of being in your desirous presence. You need a strong partner that can keep up with you, and satisfy your romantic ideas of what love and sex are, or you'll toss them aside in disillusionment, and look for the next ripe piece of romantic, idealistic splendor to feast your intelligent beauty and hands upon!

The Sun: That Radiating Warmth

You radiate heat, which warms up the birth chart where the Sun is placed like a honey-amber shaft of super-intelligence. It throbs and energizes everything it touches within the spectrum you call Yourself. To see how the Sun plays, fights and dances within the essence of You, look to the other planets and angles and the house where the Sun has taken up residence, to see what feverish and egocentric interactions are occurring in your baby cells.

When the energizing Sun powerfully connects (conjunctions), challenges (squares), and provokes (oppositions) the other planets, there is a tendency to energize the Sun in a vigorous manner so that your ego sits heavy and fat in the saddle. When the exuding Sun flows (trines) and supports (sextiles) the other planets, it gives warmth and confidence and a natural ebullience that can warm cold tootsies.

**“Nature produces the greatest results with the simplest means.
These are simply the sun, flowers, water, and love.”
-Heinrich Heine**

Your Warm, Radiating Sun is in Scorpio

Your vital and energetic glow is penetrating and possessive. You desire to have great control over your partner, so you can play them like a powerful conductor and revel in the excruciating thrills and incoherent pain this brings the both of you. You prefer to be intensely wrung emotionally, thus experiencing the agony and the ecstasy. The only way to live! Secretly, you are a natural born sex therapist and can uncover all sorts of sordid sexual secrets that most people don't know about, and wouldn't care to, either! You may have monkish periods of abstinence at times in your life, but your root chakra is always pumping out dark red sexual energy, which can be channeled in other ways if times are dry, rather than unknowingly spraying it all over innocents. Practicing the art of letting go will increase your power tenfold and also release your obsessions, to fertilize our holy earth.

The Sun Exudes in the First House

You are a bright light that stands out in a crowd of washouts. You exude warmth and vitality that feels great, like sitting your naked bottom in warm beach sand, and wiggling it around, to get the full measure of heat. You like get to the point, including getting into bed, clothes off, smelling, touching and tasting your partner's creamy body, moving slowly, deliberately, and assertively. Your partner will still be deciding if they want to have sex with you, and it will be over! You are very magnetic and powerful and certainly, hard to resist. Everyone secretly thinks “Can I have some of that?” imagining you will light their fire until they weep. You may not be the subtlest character, but who cares?

Your Sun powerfully connects (conjuncts) with your Animal Skin, the Ascendant

You stroll along, swinging your arms, humming throatily, flinging your hair about, unaware of how divine you are – or maybe you do know. You could be in a cheesy flick, like “Mary Poppins”, appearing as Julie Andrews or Dick Van Dyke. You just feel so good about yourself, and even when you don't, people want to be in your energy field just to feel you, you're just so warm and toasty, like a cinnamon bun with icing! You have many admirers and all want a piece of you to taste and savor, and they don't particularly want to share, either! You can be selfish and pushy; check in with your partner before opening your lovely legs and gyrating. They may not be in the mood.

Your Sun supports (sextiles) Frosty, Plasmic Neptune

You'll have many opportunities to be creative in this life. You can weave illusion as good as the Master Magicians Siegfried and Roy with their wild animal kingdom. You can get your baby to lay down, spreading his or her luscious legs with a mere clap of your hands. You can also get your baby to levitate with the onslaught of sexual feelings you cause to arise in their Levi's. Such skill! When they open their eyes, - poof! - you are gone. Did they just imagine that?

Your Sun powerfully connects (conjuncts) Simmering Pluto

Power person – that's you! Like you didn't already know that. You radiate sexuality, and then radiate some more. Some are scared of you, and the sexual levels of rapture you could bring to their closed minds. Others want you to take them there, selling house, car, and children to tremble beneath your knowing fingertips and moving the body with vats of delicious, decadent experience. Since you are so used to taking control, when the control gets taken from you, it may have the effect of pushing a button, which puts you in "battle mode". Once outfitted in your war paint, you can be quite ruthless at getting your way. To avoid these asinine games, challenge yourself by letting your lover take control, fumbling though it may be. This will have the opposite effect, and actually increase your power tenfold. Try it! Assume the inferior position and take it like a man/woman.

The Moon: Feelings, Nurturance and Wetness

Wherever the Moon is placed like an oozing dew drop, is where feelings abound and sometimes run amuck. It's also where you like to do what feels good to yourself, things that you certainly will do, whether alone or with a lover of great fortitude! When the Moon touches another planet it creates a swirling tropical cocktail of its own milky needs and is to be tasted and experienced with great gooey gusto.

When the Moon powerfully connects (conjunctions), provokes (oppositions), and challenges (squares) the other planets, this tends to give the Moon a more powerfully reactive state (much harder to control!). The flowing (trines) and supporting (sextiles) aspects are soft and dreamy, sometimes in a sweet, mellow way, other times in a lazy, indulgent and chubby way.

“I think sex is better than logic, but I can't prove it.” Unknown

The Moon's Emotions Undulate in Scorpio

With the Moon in Scorpio, you respond in an intuitive and determined way to emotional situations. You keep your deep and turbulent feelings, distant from most possible sex partners, until you have sniffed out their psyches and determined whether you can trust them and hopefully, control them, too. Once you have decided the cards are in your favor, you'll begin to let your pheromonic steam out slowly, directing it towards the partner's glands (unbeknownst to them). You'll surround them with this hot steam, till they begin to sweat and strip off their clothes, in an effort to get cooler. The partner, now naked and vulnerable, is a sacrifice to do with what you will. Be nice! Jealous and revengeful when slighted slightly, you have sharp Kali Goddess teeth that can disembowel.

The Moon Soaks the First House

With the Moon in the first house, your feelings are very responsive and everyone gets to experience them along with you! How fun! People can read your face, even though you may try to remain stoic. Give it up and go with the flow, baby! Oversensitive to environmental and people stimuli, you are quick to react and respond. You can be defensive, and will assume boxing position over things that do not concern you and were never meant for you personally. Quite responsive in bed if plucked just right, you are great fun to play with and torture and observe! You may become irritated with people playing games with sexual tension and lengthening the outcome of the sex act at your expense, the bastards. Sometimes you are a crybaby.

Your Moon Powerfully connects (conjuncts) Flirtatious Mercury

Your sexual mind is connected to your sexual emotions. Imagine that! You know what you want and like, and have no trouble working your vocal cords to state your feelings on the subject. This is a great gift for the lovers of the world, because 9 out of 10 lovers don't have a clue what to do, though no one is admitting anything. Your words can come out quite dramatic and spirited at times, having a tendency to make others take a step back in order to regroup. Be aware of your words and the energy behind them; all that ebullience may feel good to you, but your lover may be feeling a bit shy and reticent, and need you to help scotch those undies down!

Your Moon supports (sextiles) Mars' Sexual Urges

You are confident and self-assured, and all the saplings of the world want to eat you for an energy boost! Setting out to do what you planned to do is as natural as breathing to you. Opportunities to assist your Quest are scattered at your feet like so many fruit. You reach down languidly plucking this one or that, feeling it's plumpness and weighing its juiciness in your palms, tossing it over your shoulder if it doesn't comply. Sexually, you enjoy your lust with great efficiency, thirst, and potency. You grunt and groan with pleasure over the experience, smells and textures of sex, not to mention that lover slipping and sliding all over your sweaty body!

Your Moon powerfully connects (conjuncts) Saturn's Restriction

You may have started out sexually, rather shy and inhibited and even frozen. But that ends when you discover a patient, older lover to show you "the ropes". To swing from them with great finesse – learning all sorts of pleasurable things with different parts of your body, inserted in places you would never have thought could feel so good! Soon you become a teacher yourself, showing others how to learn what goes where, and yes, (you tell your lover), that is an orgasm you just had. You may have more sexual fears than your average Moon God/dess, but do not despair; by exploring these fears and meeting them as a challenge, you will increase your power to the Olympic level! Get to know the whole body, including between the toes, under shadowed armpits, and that smiling nether crack that doth call to you.

Mental Expression

Your mental expression articulates and gesticulates in the birth chart where Mercury is placed, like a mime in a leafy city park. Look at the sign placement, the house placement, and the other planets involved with mischievous mental-case Mercury to see how you will experience your communications and thought processes.

The powerfully connecting (conjuncts), challenging (squares), and provoking (oppositions) aspects tend to give Mercury's quicksilver tendencies, a laser zap in consciousness. The flowing (trines) and supporting (sextiles) aspects are softer and more laid back, but they also speed the brainiac synaptic environment up to a nice clip!

**“Love is the answer, but while you are waiting for the answer,
sex raises some pretty good questions.”
-Woody Allen**

Articulating Mercury flirts in Scorpio

Mentally you think in a penetrating, intuitive way and have a focussed, psychological way of speaking. Your thought processes feverishly steam in a continuous manner over your nerve fibers, forming obsessions involving just about any subject or person. What fun! It is this penchant for obsession that allows you to research so very deep into the recesses of the collective mind. It also gives you a sense of humor that is dry and clever, reacting to the subtle animations in others with bubbling, chortling laughter. You can touch people's sensitive buttons easily, and will not hesitate to zap them, should they annoy you with their infantile games. You devilishly pick up sexual innuendoes in the most sweetly innocent of conversations, grinning shaggy smiles all the while. Because your tongue goes very deep, it is finely tuned to the art of psychological probing, its assets are implicated elsewhere, like in the world extremely exciting deviations!

Mercury's Intercourse Reverberates in the First House

With Mercury's verbal intercourse echoing in your first house, you are direct and forceful in your speech. You aren't one to shy away from a confrontation. You enjoy taking the bull by the horns, swinging it about yourself with great panache, letting it go to crash somewhere in the distance. When lovemaking, you assertively interact with your partner with great energy. You'll find out what your partner likes and then do it to their fine body. Over and over and over again, until they are hooked on your assertive, passionate style. (Either that or numb!) No one will be able to give them satisfaction like you can, ever again! Memories of you linger about one's hairdo. You are an open-minded, basic hoochie-mama or papa. You can be impatient with the more shy, reticent types.

Your Mercury supports (sextiles) Mars' Sexual Urges

You are a scrappy little fighter with words! You also know when to call it quits and admit defeat. Mama didn't raise no fool! You are a lively thing, your eyes dancing with mischief and keen perception. You notice everything, grasp ideas and concepts quick and readily, like a dog jumping up to catch a Frisbee! Sexually, you can play with this energy by using your happy-go-lucky hands on your breathlessly awaiting partner. Or, you could whisper into your lover's ears, so the little ear hairs vibrate, sending shivers coursing down to Love Central. This brings new meaning to the word “squirm”!

Your Mercury supports (sextiles) Jupiter's Abundance

Warm, titillating, funny, vibrant – these are just a few words to describe the energy that spills from your ruby lips. You are an optimist and believe others are, too. Thus you create magnetic, warm energy patterns around yourself and others. Sexually, play with this energy by talking your lover into bed in a fun and diverting way, only using delightful words whose main purpose is to maniacally thrill. Once your lover is at your disposal, place your voluble mouth strategically, teasing but never completing the task, until your lover breathlessly tries to pull your hair out by its roots!

Your Mercury powerfully connects (conjuncts) Saturn's Restriction

You will usually find what works for you sexually most of the time, and stick to that, in the hopes you'll at least score once. This is fine, and allows you to really develop the specific techniques you have chosen as your "trademark". On the other hand, you can find yourself in a rut and at a loss if you discover your lover isn't into your favorite bag of tricks. What will you do? Ask them what they like? Or are you too shy? Avoid and pretend? Please, don't let that stop you – force yourself to open your red mouth. Choose talkative, confident lovers to assist you with your panties, and then some. Avoid being too critical; you'll end up all by your sad lonesome, you and your friendly but untalkative hand, singing the banjo blues.

Desire and Attraction

Your desire and attraction flower and sweat fragrantly through the birth chart where Venus is placed like a musky perfume. Look at the sign placement, the house placement, and the other planets involved in the Venus pheromonal love dance to see how you will experience your wants and needs, give affections, and gratify your most astounding self!

If you are a woman, Venus shows how you expose your femininity. If you are a man, where Venus is placed is the type that you are attracted to, the type that will make your wand stand at attention and perfection! Venus is also your “Inner Feminine”, waiting to be contacted and explored for healthy emotional balance. (Little secret: A man in contact and working with his inner feminine flower is like a man wearing a sarong or kilt – very charismatic and magnetic!)

When Venus powerfully connects (conjunctions), challenges (squares), or provokes (oppositions) the other planets, she tends to be more feisty and provoking, and has more liveliness to her sexy twitching tail. When Venus flows (trines) with and supports (sextiles) the other planets, she is very soft and creamy, indulgent and lazy. The Butter Queen!

“What is a promiscuous person? It's usually someone who is getting more sex than you are.” Unknown

Enticing Venus is in Sagittarius

With Venus in Sagittarius, you are a feisty little package of meat! On the go and full of love of life and all its peculiarities, you exude charm, intelligence and warm humor. Your eyes have a heated, lively look to them. When in love, you are adventurous and exploratory and may have a fiery, quick release. Your desire nature burns enthusiastically, like a bonfire at a beach party! You are playful, but also like to groove to the natural sex vibes when you are riding the thrumming rocket energy of sexual love. Sex outdoors, like skinny-dipping on a secluded beach, or maybe in a canoe, or what about in a cool treehouse?, is your idea of “technique”. Flirtatious and friendly, you are game for a physical sexual experience that exudes a challenge, in a natural, enthusiastic way, and that opens your fresh, inquisitive mind to new sexual highways of experience.

Your Venus is frolicking in the Second House

With Venus swinging her hips in the second house, you show affection by showering your lover with physical things. Like chocolates, silks, hand-fed sushi, little neck clams slurped into your lover's mouth (along with a bit of seawater) and of course, long lasting serial sex that leaves the couch stained and pitted, smelling delightfully fragrant! Sharing sensual massages would be a good preliminary, or dressing each other in silk thongs or scarves, making sure the little straps are placed strategically and pulled nice and tight! You are steady and secure to have around, and you are not above blowing a few bucks on your lover to make sure the whole experience is complete and sensual.

Your Venus powerfully connects (conjuncts) with the Uranus Wiggle

Your approach to sex and love is a bit unusual, a little bit ahead of its time. Others may not understand your approach and judge you, poor dears. Your desires are independent and far ranging, detached and friendly. This energy seeks to experience and to share sweetly with dear friends, in a healing way. Being with lovers who are your friends and happy to play and share is an unending delight for you! Power comes best to you when you are independent and free, in your mind. Give thanks to the gods each time you and your lover reaches one those delightful, fruitful orgasms for blessings to rain down upon your head, wetting your hair. Don't take any sweet joining for granted, no matter how casual.

Personal Power and Sex Drive

Your personal power and sex drive notifies you of its thrust through the birth chart where Mars is placed like a phallic prong. Look at the sign placement, the house placement, and the other planets involved to see how you will experience the Mars' battle of competition, assertion, along with the most favored rutting of champions!

If you are a man, Mars signifies your exuberant masculinity. If you are a woman, where Mars is placed is the type that you are attracted to, the type that will make your jade gate open, your flower bloom. Mars is also your "Inner Male", waiting to be contacted and explored for healthy emotional balance. (Little secret: A woman in contact and working with her inner male cocky ya-ya is incredibly sexy and magnetic!)

The planets that powerfully connect (conjunctions), challenge (squares), and provoke (oppositions) Mars, make him strong-willed and self-oriented (unless paired with Neptune). Like Zena or Hercules, the warrior stands vigorously! The planets that flow (trines) and support (sextiles) tone down Mars' gnashing teeth and manifest a more balanced and less rough use of these ambitious, squirting energies. This all depends on which planet chooses to combine with Mars and his sexual grapple to the pinnacle!

"Sticks and stone may break my bones, but whips and chains excite me" Unknown

Mars' Sexual Urge rises in Capricorn

With Mars in Capricorn, you express your sexual energy in a careful, determined, and manipulative way. You are quite keen on taking your partner over the edge, and will do it, even if it takes forever, drooling over your lover's wonderful body, basking in the power of your masterful, stimulating techniques, and both of you swimming in puddles. Very sincere and relentless in the pursuit of your lover's warm, moist body, you will soon have he or she eating out of your damp palms (or something equally damp, if not more distracting and interesting)! Remember to introduce new variety into your routine; the only difference between a rut and a grave is the depth.

Mars' Sexual Urge beats in the Third House

With Mars in the third house, your sexual energy plays out in a verbally tantalizing way. Active dialogue with family, friends and colleagues is a major source of exercise for you! Your word play is full of jousting and penetrating innuendoes. Flirtatious and verbally aggressive, you use communications to seduce the unwary in a delightful but sometimes bratty way. Inventive and playful in bed, look for lovers that appreciate your mind and it's weird hair-pin turns that manifests in creative drooling sex, not to mention tongue jousting for an encore!

Your Mars supports (sextiles) Saturn's Restriction

You have self-control down to a science. There is a little muscular fist psychically living in the approximate area of your belly button. It is powerful and disciplined, and you have many opportunities to express this energy in a masterful way. What this translates into in the world of love and sex is someone with great staying power, making sure the lover-dear is completely satisfied before finishing off your own dastardly satisfaction. In a world filled with short lovemaking spurts and squirts, with everyone being tired and busy and other assorted conundrums, this is indeed a golden gift from the gods! Introduce variety to help the game. Let go and let the waters flow.

Optimism and Abundance

Your optimism and abundance deliver the spiritual and material goods in the birth chart where Jupiter is placed like an overstuffed and magnanimous Titan, secret gifts of plenty spilling from his pockets, making a prodigious mess around his feet. Look at the sign placement, the house placement, and the other planets involved in Jupiter's broad-minded search for the sensual meaning of existence, to see how you will experience your own optimism and cell-expanding abundance (and also the twinkling light on your spiritual path).

Jupiter powerfully connecting (conjunctions), challenging (squares), and provoking (oppositions) the other planets tend to magnify Jupiter's generous mood in an intoxicating, bloated manner. When Jupiter is flowing (trines) or supporting (sextiles) the other planets there is an excessive swelling as well, in a sweeter lazy way, like a nudge on a couch, eyes half-closed, mind pleasantly buzzing, stomach stuffed with burritos and beer.

“I generally avoid temptation unless I can't resist it.”

-Mae West

Jupiter's Abundance spills in Capricorn

Your enthusiasm has an elder spirit inhabiting it and is filled with the force of mountains, when tapped. The gift of Jupiter for you is growth through experiencing great dedication and perseverance in matters of great earthly import, and that mean very much to you personally. Sexually, this also includes a partner's damp body underneath your moving palms, while your eyes glisten, and which as we all know, is a most serious matter indeed!

Jupiter's Optimism pours into the Third House

Inspiration expresses itself in you with a jocular and mentally lively manner. It is a spirited intellectual energy that throws intriguing information all around, stimulating the likes of one and all. Ideas pour into your mind continually like a gravy train! This is especially effective in the sexual area, where you can literally talk your lover into bed with your effervescent big sky mind, lubricating all channels in the process!

Patience and Persistence

Your patience and persistence plod ever onwards through the birth chart where Saturn is placed like a Big Daddy, stubbornly insisting on work and responsibility, the old curmudgeon! Look at the sign placement, the house placement, and the other planets involved in Saturn's authoritative, restrictive policies to see how you will experience your need for discipline and manifest great endurance. This includes being mentally flogged occasionally – by yourself and others – so you get the message! (Don't worry, it all works out in the end.)

The powerfully connecting (conjunctions), challenging (squares), and provoking (oppositions) aspects tend to bust Saturn's iron nuggets, (or yours!), causing frustration and tension but also making available great endurance and fortitude. The flowing (trines) and supporting (sextiles) aspects soften the frustration and tension, letting things work together rather well in a steady, productive and practical manner, giving a decent share of self-control to aid in the manifestation of sexual (and otherwise) successes.

“Sexual harassment will not be reported, but it will be graded.”

-Anonymous

Saturn ties you down in Scorpio

You respond to structure and limitation in an emotional and controlling way. Your psychological depths are a point of fear for you, an issue which you endeavor to avoid acknowledging at all costs. Nevertheless, the exploration of all your hoo-dos and hang-ups is the task at hand. Once you go there, the teacher emerges to lead others down the Way with great resourcefulness and pluck! Sexually, you will manipulate rather than speak about your feelings, which is difficult for you. It feels like there is an invisible gag over your mouth, vulnerability is so painful! A classic example of this type of manipulation/dilemma is to withhold sex as punishment when you are angry at your lover, or he or she will do the same to you – ouch!

Saturn has you under First House Arrest

Responsibility and limitations express themselves in your body and your presentation. You need lots of encouragement when expressing yourself because of a great feeling of cautiousness and conservatism at times. Not exactly spontaneous, you like to stick to the tried and true presentations of the body, mind and dress. As you age, you become like fine wine – delicious for sipping slowly and swirling in one's wet mouth. You are a solemn creature, who takes his or her sexual involvement seriously. You may have a tough time expressing yourself sexually, but you must keep at it, it will be worth the effort, and effort is something you excel at!

Individuality and Independence

There is a natural life energy that is sexual and lies coiled and resting at the base of the spine. This is called Kundalini. Some astrologers believe the planet Uranus is representative of this energy. When Kundalini is triggered gently (or forcefully), it flows up your spinal cord, through the chakras or energy centers and meridians, unless blocked. Briefly, when blocked, it can cause disease and/or physical, emotional, mental or spiritual problems.

Kundalini and Uranian energy is a sexual, creative, electromagnetic synaptic energy that keeps our electrons twisting and sacredly dancing the night away! It has an abstract, far out influence that is filled with spontaneous genius and creates a big sky mind (expansive). It deserves to be cleaned vigorously and grounded on a regular basis so our eyes are lit from within...

Look at the sign placement, the house placement, and the other planets that are electrified in aspect by Uranus. The powerfully connecting (conjunctions), challenging (squares), and provoking (oppositions) aspects tend to create a hyper-wiggling or nervy energy that is hard to contain and needs lots of freedom to exist in its space. The flowing (trines) and supporting (sextiles) aspects intertwine together better, but still create a Uranian current that pulsates the airwaves and your nervous system, zapping consciousness with overflowing, lightening intelligence.

**“Like a fierce wind roaring high up in the bare branches of trees,
a wave of passion came over me, aimless but surging...
I suppose it’s lust but it’s awful and holy like thunder and lightning and the wind.”
-Joanna Field**

Your Uranus Swings in Sagittarius!

Your generation’s sexual kundalini energy is fiery and courageous. Your spinal cord, once grounded and triggered gently, will create inspiring ideas that wet you silly, by being stimulated with real Truth and the dynamism of Nature. Try combining religion or spiritual beliefs with sexuality, researching what other lands and people do when coming together sexually. You will find seeds of Truth to apply to your own beating existence, making it stronger and pulsating it like a rocket of inspiration and joy! Take a trek or quest to a place wild and rich with Nature’s primal energy, like roaring waterfalls or bald mountain peaks or rocky islands. There, mate with your lover with astounding celebration!

Uranus is taking liberties in your Second House!

Independence, eccentricities, and sudden change exhibit themselves in your sense of security and possessions. Ingenious or alarming methods of getting money is what you do for fun! Paying for pleasure may rock your boat, or you may be a Minute Man or Woman. Kundalini exercise: While pleasuring yourself, stop just before the orgasm occurs, concentrating on your heart area, the Anahata center, sending the sexual heat there. This will feel warm and soon your whole body will feel like warm liquid. This will markedly increase your participation and experience in the sexual experience!

Creativity and Illusion

Your creativity and illusion exude forth through the birth chart where Neptune is placed, like a vibrational bath with oily colors fluctuating and shifting over the surface. Look at the sign placement, the house placement, and the other planets involved in Neptune's weeping rainbow of inspiration and foolishness, to see how you will experience your creativity and illusion. Musical, mystical and dancery, Neptune escapes the reality of this world in many ways, including sleepiness, drugs, and instants of insanity and autism.

The powerfully connecting (conjunctions), challenging (squares), and provoking (oppositions) aspects tend to diffuse and confuse (read: denial) normal planetary energy patterns, though they do give extraordinary shots of colorful, mystical and creative experiences! The flowing (trines) and supporting (sextiles) aspects are deceptive and hypnotizing, in a lazy, glazed, but inspiring way. Neptune does not respond to the usual practical applications the other planets do. Neptune does respond to (and loves!) warm, energetic work on the body (which can be done through chakra/energy center work), creative endeavors (ah, music!), and mystical experiences, which are excellent channels for it's very magical and sweetly psychotic vibrations.

"Lovers, to bed; 'tis almost fairy time."

--A Midsummer Night's Dream

-Act 5, Scene 1

Neptune's Beguiling Bubble is in Sagittarius

Your generation's sexual idealism and sexual receptivity is truth seeking and adventurous. This also includes going down the wrong trail, getting lost, and having to double back about three or four times. You approach your wildly creative dreams in an inspiring and enthusiastic way, and must remember that full sexual gratification cannot occur if you have left the scene.

Neptune's Silvery Whistles are heard in your Third House

Sexual fantasies and idealization play themselves out in your vivid imagination and psychic communications. You have the ability to weave a web of seduction with your shifting words, and can send psychic demands to your lover. Fantastic sexual scenarios of erotica can leave your lover damp and panting, furiously burrowing in their gear. Beware of the tendency to be a slippery, hard-to-pin-down or vague communicator, not looking in your lover's eyes. Withholding information is considered deception, and if you do it, your lover will consider the game fair, and do the same to you and your chubby cheeks.

Your Neptune supports (sextiles) Simmering Pluto

A generational aspect that goes on for a trillion years (just kidding), it operates in the background unnoticed unless it touches a sensitive genitalia point on your lovely, pulsating body. At that point, you would feel certain effects taking place at a deep inner core, where a huge light-filled quilting bee is taking place, amongst the spirits and guides that hang out with you. No one will notice these happenings, maybe not even you, especially if you are doused heavily with food, alcohol or drugs (you know, the normal human condition). This miniature, magical Mardi Gras is actually occurring in your DNA, in the spiraling helixes of the gods. There, the helixes twist and turn to a vibrational song humans cannot normally hear; creating new, unbelievable strands that signify outstanding cosmic perceptions undiscovered by little dweeby men in their white, flapping lab coats. Short (or long) periods of autism or insanity manifest, and then, should your consciousness survive intact, evolution takes place with a soft, unnoticeable, undulating pop.

Pluto: The Ultimate Orgasm, That Old Black Magic

Transformation and change rumble forth through the birth chart where Pluto seethes like a nuclear vault. Look at the sign placement, the house placement, and the other planets involved in Pluto's scalding cauldron of death and birth, to see how you will experience transformation and change and test your boundaries. Pluto experiences can be painful because of the change and truth involved, yet Pluto is really your Secret Santa. Look for his gifts when the smoky, sulfuric air has cleared. Look under rocks, in between legs, and where the raven flies.

The powerfully connecting (conjunctions), challenging (squares), and provoking (oppositions) aspects tend fester and then spew forth in a powerful, controlling manner when in Pluto's scaly arms. The flowing (trines) and supporting (sextiles) aspects soften and smooth Pluto's continuous, controlling hold. Pluto wants your vulnerability. He also wants you to let go of that which you compulsively grip most deeply. Your primal scream will be heard throughout the galaxy when you finally do...

**“Anything will give up its secrets if you love it enough.”
(George Washington Carver [1864-1943])**

Pluto Rumbles in Scorpio

Your generation's sexual transformation will come about through a descent into the sexual underworld of power and magic, where you will activate a shamanic healing and then bring this gift to others. Anything that encourages exploration of your psychology in an aggressive manner is a particularly provocative approach to get at those sexual fears and blockages faster than a speeding bullet! Intense psychological experiences are major vibrational keys for you.

Pluto is Seething within your First House

Sexual power games and transformation take place in you and your body. Your body is probably strong and throbbing and has gone through many changes and alterations. Even if you are small, you still have a nuclear vault of working energy throbbing in your belly! You project this energy from your solar plexus with a decided she-bang, she-bang! You can shove someone out of the way, just by intentionally thrusting this energy forward. Try it consciously sometime, maniac! You like to dominate your partner, either covertly or overtly. Instead of doing a power trip on your lover, be open about it. Make a game of it, so everyone gets to give the spankings, instead of just you, piggy.

Your Pluto powerfully connects (conjuncts) the Ascendant, your Animal Skin

You project power and confidence with a killer's instinct. You may have this cleverly camouflaged with kindness and warmth and a cheery- looking smile, all the while snapping the love-and-sex dental chewing gum between your pointed teeth! You have a strong will and ideally prefer to lord it over others - not in a bad way, mind you. You just want things done a certain way, and quickly. What's wrong with that? Should anyone be foolish enough to challenge you, a close inspection will reveal your shaggy smile exposing canine teeth glistening under the flickering, fluorescent lights, right before you grind them under your foot like a cockroach. Crunchy! Sexually, you are manipulative and like to control the action, but will fool your lover into thinking they are calling the shots, when in actuality, you are dominating them quite aggressively. Woe to those who underestimate your sexual ferocity, even when displayed in its softest, most vulnerable guise.

The End and The Beginning

Well, you're all done now! And how do you feel? Why don't you do a spot check? First, check your breathing rate. It should be relaxed and very warm. How does your brain feel? Is it a bit tweaked? How about your beating heart? Put your hand there for a moment and make it warm with your mind. Do your armpits smell musky, like pine? What's going on in your shady nether regions?

Now go pour all the rosy red love in your heart into someone else's heart area for five minutes, at least once a day. Keep it a secret – no telling! A stranger or a friend - pick one. Do it as a visualization and then forget about it. Do it for a month and watch how your body and your life heat up dramatically and sweetly, overflowing like a frothy rosy wave. You will be licking your lips happily all the merry day and your eyes will shine with otherworldly light. People will want to touch you and you will want to touch others...
